Emotional Support Chatbots

1. Global Mental Health Crisis
2. Accessibility Gaps
3. 24/7 Support
4. Advances in AI.
5. User-generated Content
6. Positive Societal Outcomes

NEED FOR AN EMOTIONAL SUPPORT AI

- Over 970 million people globally suffer from mental health issues, with anxiety and depression being the most common. (Our World in Data)
- 76%–85% of people with mental disorders in low- and middle-income countries receive no treatment. (WHO)
- 70% of users report feeling comfortable discussing sensitive topics with AI chatbots compared to humans. (Forbes Tech Report)
- 90% of Gen Z prefer digital platforms for mental health support due to convenience and privacy. (American Psychological Association)
- AI-based mental health apps have shown up to 60% improvement in mood tracking and anxiety reduction. (Journal of Medical Internet Research)

FEATURE OVERVIEW

1. **3D Avatar with Multilingual Capabilities**: Interactive 3D avatar powered by Mistral-7b for engaging, multilingual conversations and voice response.
2. **Chat Page with Text & Voice Inputs**: Seamless AI-driven support using Gemini and RAG with both text and voice options.
3. **Chat History & Contextual Responses**: AI adapts responses based on previous chats for personalized support.
4. **Calling Feature**: Real-time voice support through secure Twilio-powered calls.
5. **Self-Assessment Page**: Mental health tests for conditions like PTSD and depression with personalized assessments.
6. **Community Forum Page**: Engage in discussions, create posts, and interact via upvotes, comments, and downvotes.

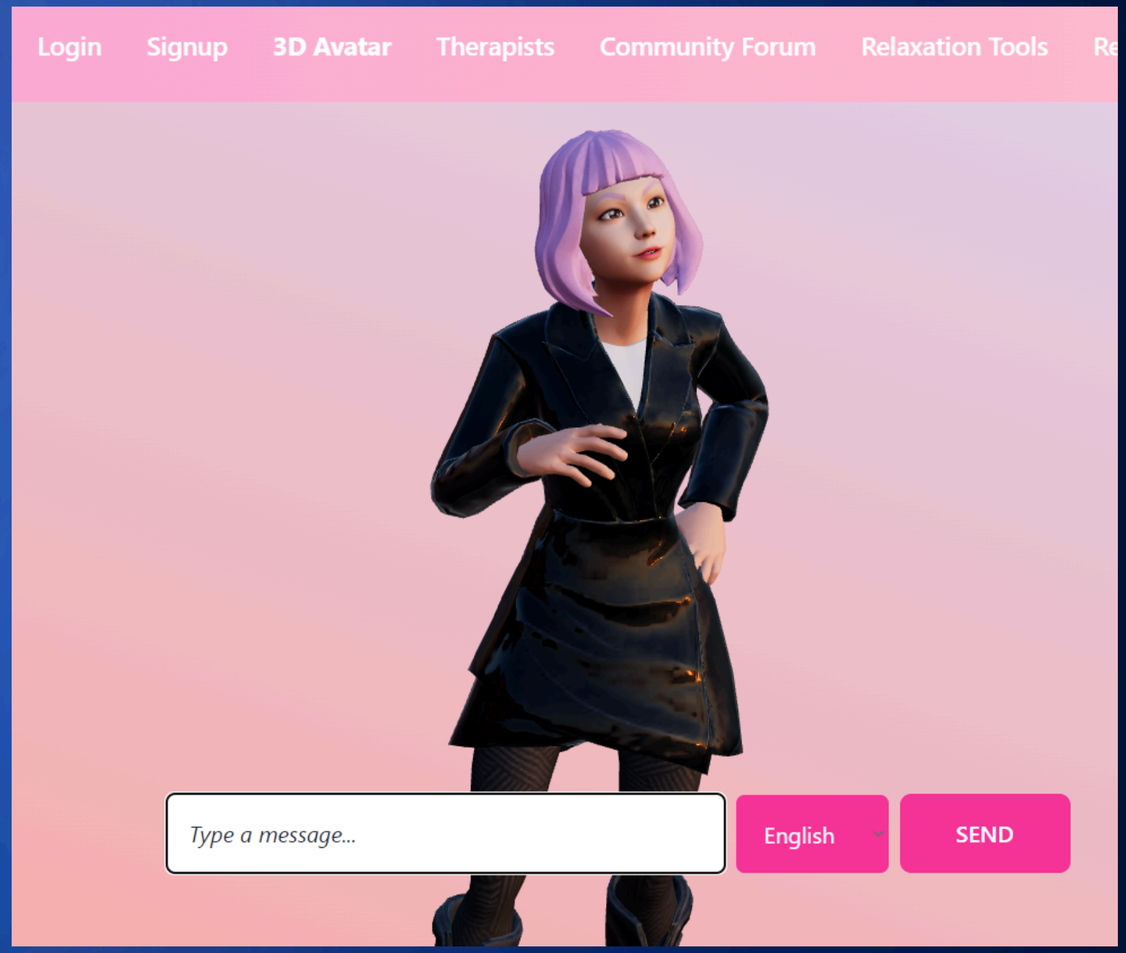

7. **Therapist Page:** Book appointments with certified therapists for professional mental health support.
8. **Breathing Exercise Page:** Guided breathing techniques like 4-7-8, box breathing etc with voice instructions.
9. **Relaxation Music:** Soothing background sounds like ocean waves and calming melodies for stress relief.
10. **Guided Meditation Page:** Visual animations designed to promote mindfulness and relaxation.
11. **Resources Page:** Curated audio, video, and literature materials for mental health awareness.
12. **Helplines Page:** Quick access to global mental health crisis helplines for immediate support.
13. **Home Page:** Overview of key features, FAQs, and dynamic 3D background for an engaging introduction.
14. **Auth (Login & Signup Pages):** Secure user authentication built with Node.js and Express.js.

3D AVATAR

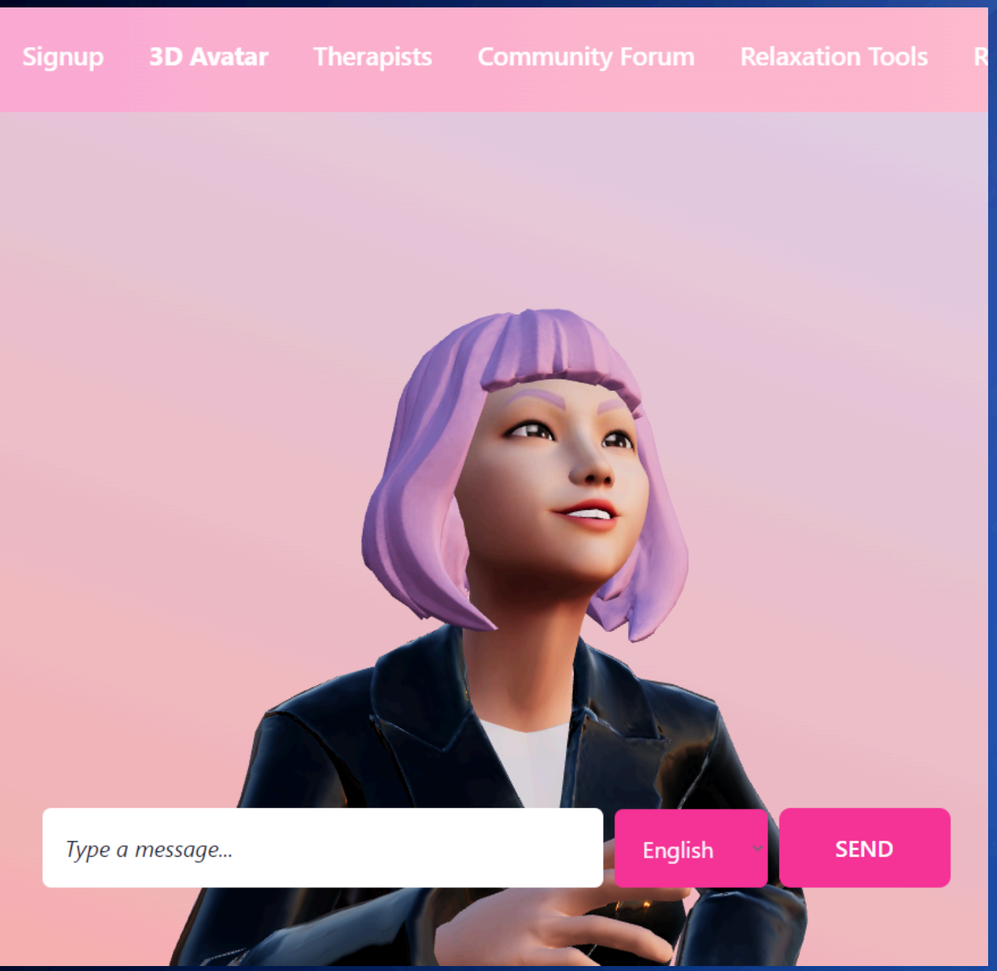

07

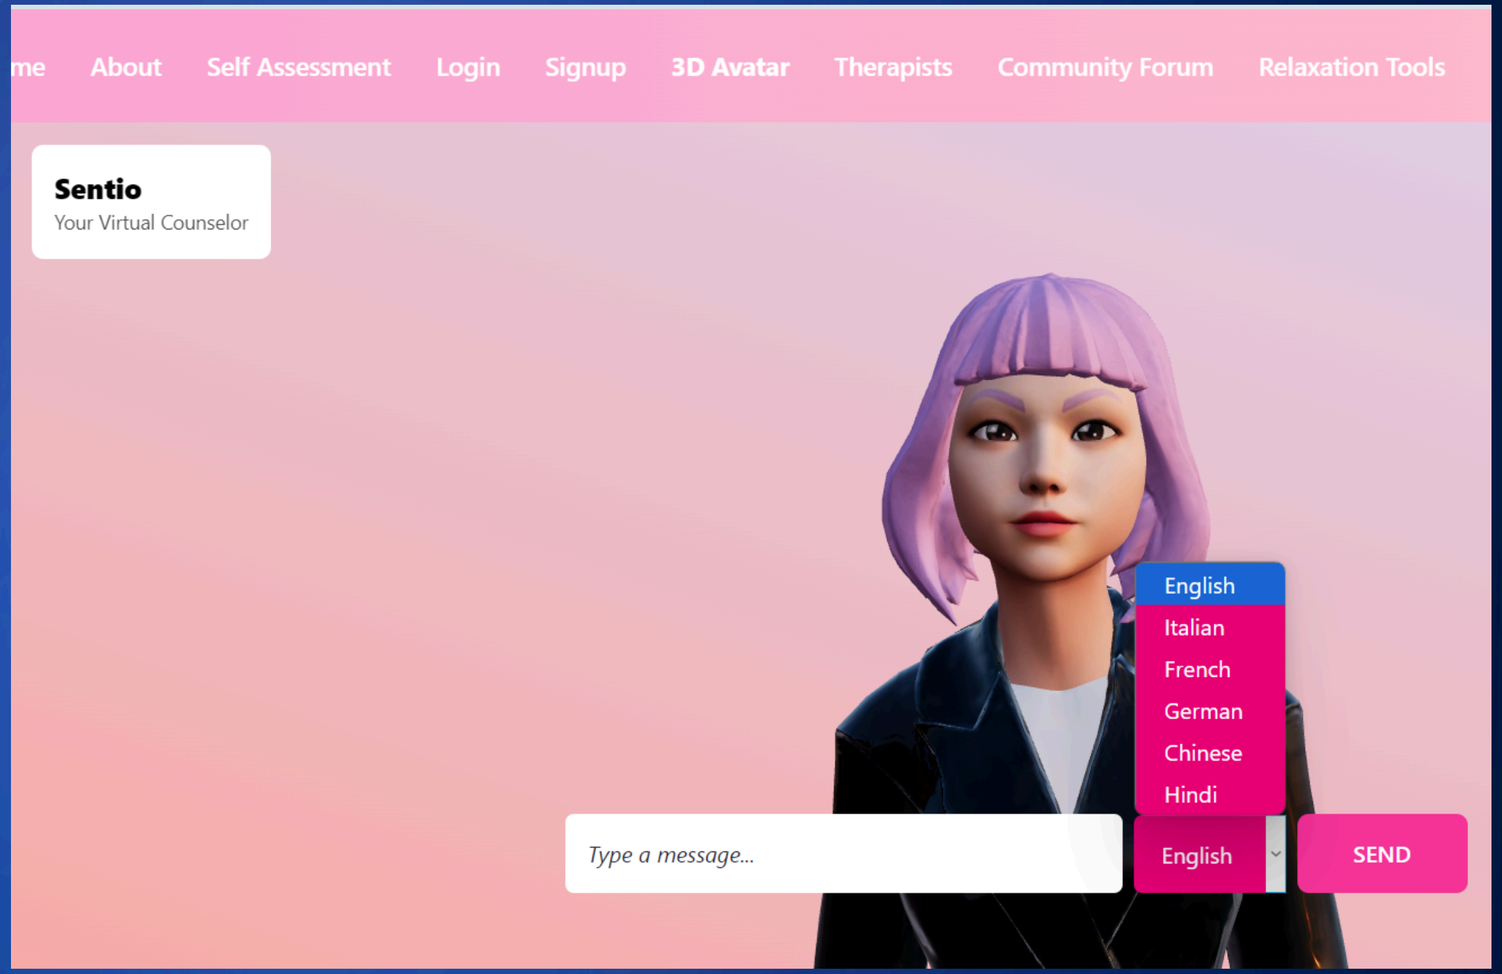

An advanced, interactive 3D avatar designed to provide a more engaging and empathetic emotional support experience. The avatar can communicate in multiple languages, both through text and voice, offering a lifelike, relatable interface for users seeking mental health support.

- **Avatar Creation**: Crafted using **Ready Player Me**
- **Animation**: Enhanced with natural movements and gestures using **Mixamo** for dynamic, lifelike interactions.
- **Facial Expressions**: Powered by **VEBA** to deliver authentic emotional expressions, creating a more empathetic connection.
- **Implementation**: Integrated into the website using **Three.js** for smooth 3D rendering in web environments.
- **Response** Generation: Driven by **Mistral-7B-Instruct**, enabling intelligent, context-aware replies.
- **Voice Assistance & Multilingual Support:** Utilizes **Responsive Voice API** for real-time voice outputs in multiple languages.
- **Lip-Sync Module:** Synchronizes avatar's lip movements with speech using **FFmpeg** and **Phonemize**.
- **Backend**: Built on the **MERN** stack.

ARCHITECTURE DIAGRAM FOR 3D AVATAR

CHAT PAGE

The Chat Page is the core interface where users can interact with the Emotional Support AI Chatbot through both text and voice inputs. It offers real-time, context-aware responses powered by advanced AI models, providing a seamless, intuitive, and emotionally supportive user experience.

- **AI-Powered Responses:** Uses **Gemini-1.5-Flash, RAG, and Google Generative AI** for fast, context-aware replies.
- **Session Management and Chat History**: **Node.js, Express.js and MongoDB** handle chat history and session continuity.
- **Real-Time Processing**: **Flask** ensures quick backend communication with AI models.
- **Voice & Text Inputs: React Speech Recognition** offers hands-free, accessible communication.
- **Engaging UI: Ant Design, Lottie, and Framer Motion** create a smooth, interactive UI.

Make a Call

what is causing my stress?

It's great that you're trying to pinpoint the source of your stress! It's impossible for me to tell you definitively what's causing your stress, as I don't know you personally. Stress has many potential causes, and it often stems from a combination of factors rather than a single event. However, we can explore some common areas that frequently contribute to stress:

Let's consider several categories:

Academic/Work-Related Stress: This is a major source of stress for many. Are you feeling overwhelmed by studies, work deadlines, or performance expectations? Are there specific tasks or projects causing you particular anxiety? The upcoming test you mentioned earlier could definitely contribute here.

Relationship Stress: Are there any conflicts or tensions in your relationships with family, friends, or romantic partners? Do you feel unsupported or misunderstood?

Financial Stress: Worries about money, bills, or financial stability can be incredibly stressful.

Health Concerns: Are there any health issues, either your own or those of loved ones, that are causing you concern?

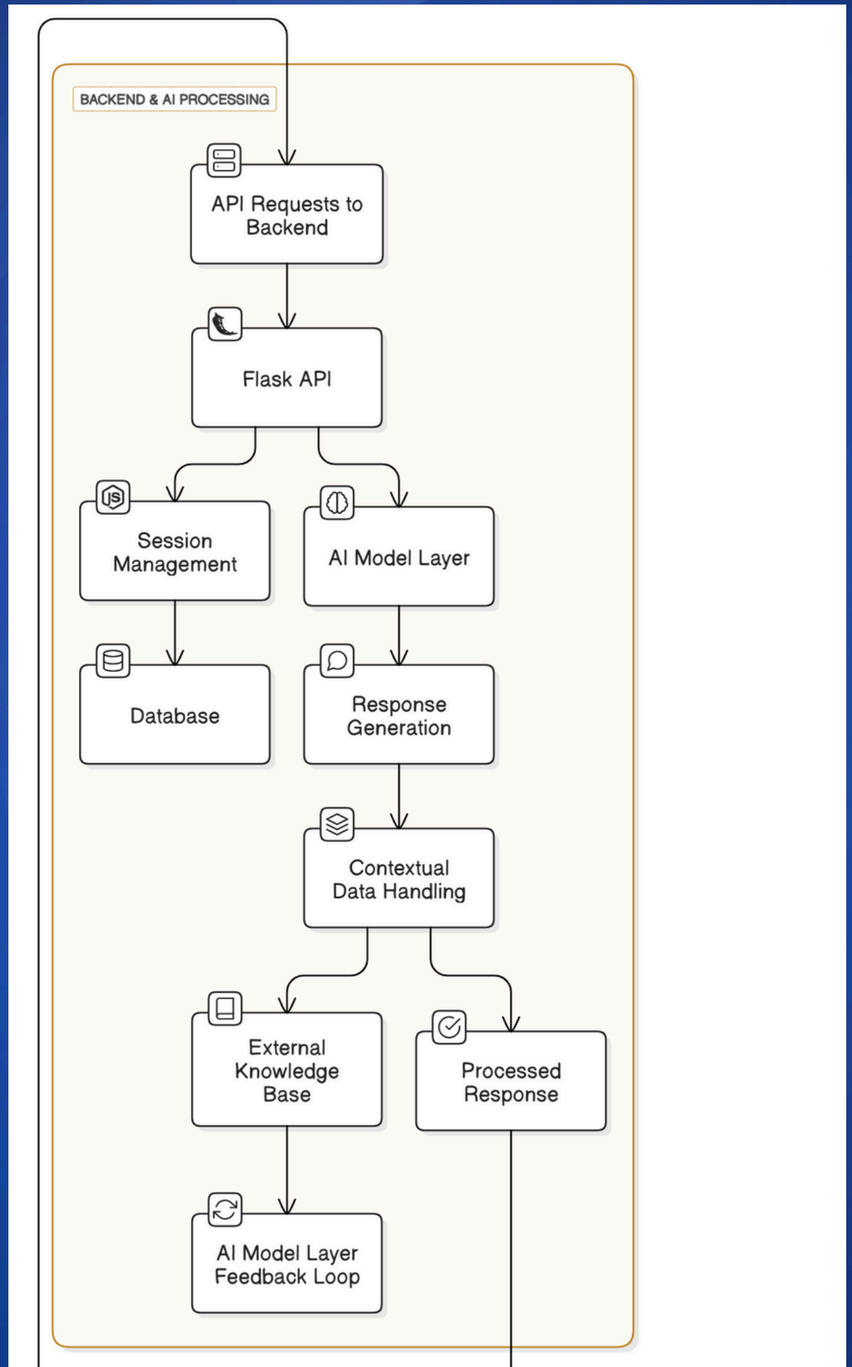

Life Changes: Major life transitions – such as moving, changing jobs, starting a new relationship, or experiencing a loss – are frequently accompanied by significant stress.

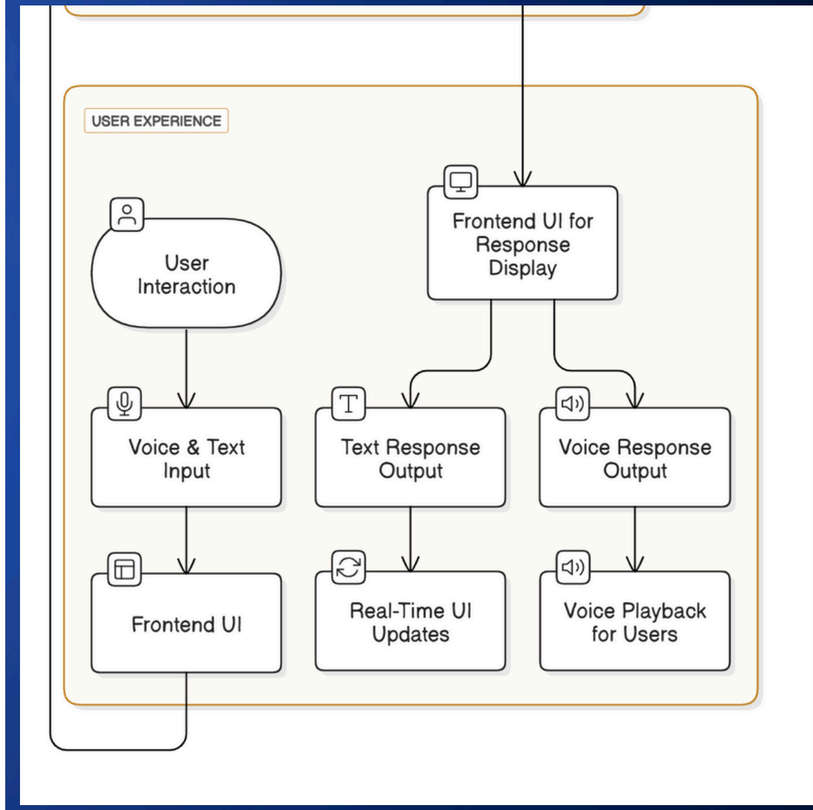

Environmental Factors: Your physical environment can play a role. Do you feel safe and comfortable in your surroundings? Is there excessive noise or chaos?

Ask what you want...

Audio Response

COMMUNITY FORUM

Interactive Mental Health Community: A platform where users can create posts, share experiences, ask questions, and engage through comments, upvotes, and downvotes.

FEATURES

- Peer Support: Connects users facing similar challenges, reducing feelings of isolation.
- Knowledge Sharing: Users learn from diverse experiences and coping strategies.
- Community-Driven Growth: Builds a sense of belonging, encouraging continuous engagement.
- Emotional Outlet: Provides a non-judgmental space for users to express emotions freely.
- Anonymity: Ensures privacy while promoting open discussions around mental health.

WORKFLOW

- Create Post: Share thoughts, experiences, or seek advice.
- Engagement: Comment, upvote, and downvote to foster interaction.
- Safe Space: Moderated environment ensuring respectful and supportive discussions

THERAPISTS PAGE

Professional Mental Health Support Hub: A dedicated page where users can browse, select, and book appointments with certified therapists.

FEATURES

- Bridging the Gap: Connects users directly with mental health professionals for personalized care.
- Convenience: Simplifies the process of finding and booking therapy sessions online.
- Continuity of Care: Supports users post self-assessment or community discussions with professional guidance.
- Trust & Credibility: Builds user confidence through verified therapist profiles.

WORKFLOW

- Therapist Profiles: Detailed information about therapists' expertise, qualifications, and availability.
- Appointment Booking: Easy scheduling with date/time selection and confirmation.
- Filter & Search: Find therapists based on specialization, language, or user preferences.

THERAPISTS PAGE

Our Therapists

Dr. Hrithik Khandelwal

Specialization: Anxiety, Depression, Post Traumatic Stress Disorders
Experienced in cognitive behavioral therapy (CBT) and mindfulness techniques.

Book Appointment

BREATHING EXERCISES PAGE

Interactive Breathing Exercise Tool: A guided page for practicing mindfulness through various breathing techniques.

FEATURES

- Stress Reduction: Helps users manage anxiety and improve focus through controlled breathing.
- Personalization: Customizable settings cater to individual comfort and progress levels.
- Mindfulness Practice: Encourages regular mental relaxation, enhancing overall well-being.
- Ease of Use: Voice instructions offer an effortless, distraction-free experience.

WORKFLOW

- Customizable Settings: Adjust inhale, exhale, and hold durations; choose from exercises like 4-7-8, Box, or Deep Breathing.
- Timer: Visual countdown for each breathing phase.
- Voice Instructions: Audio cues for smooth, hands-free guidance.

GUIDED MEDITATION PAGE

Mindfulness Companion: A dedicated page offering guided meditation sessions with multimedia support to enhance the user's mindfulness journey.

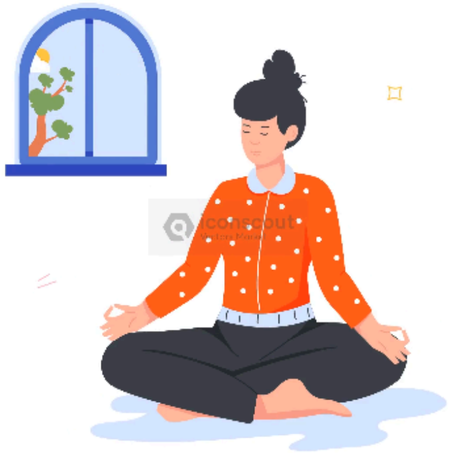

FEATURES

- Meditation Audio: Professionally recorded sessions for relaxation, focus, and stress relief.
- GIFs & Visuals: Soothing animations to support mindfulness and breathing synchronization.
- Timer: Customizable session duration with gentle start/end cues.
- Background Sounds: Ambient sounds (rain, ocean, forest) for an immersive experience.
- Daily Affirmations: Positive statements to boost mental well-being.

USES

- Stress Reduction: Helps manage anxiety, promote relaxation, and cultivate inner peace.
- Mindfulness Practice: Encourages present-moment awareness, improving emotional regulation.
- Multi-Sensory Engagement: Combines audio-visual elements for deeper meditation experiences.
- Flexibility: Customizable timers and sound settings cater to individual preferences.

HOME PAGE

Landing Hub: The central page that introduces users to the platform, highlighting key features and offerings.

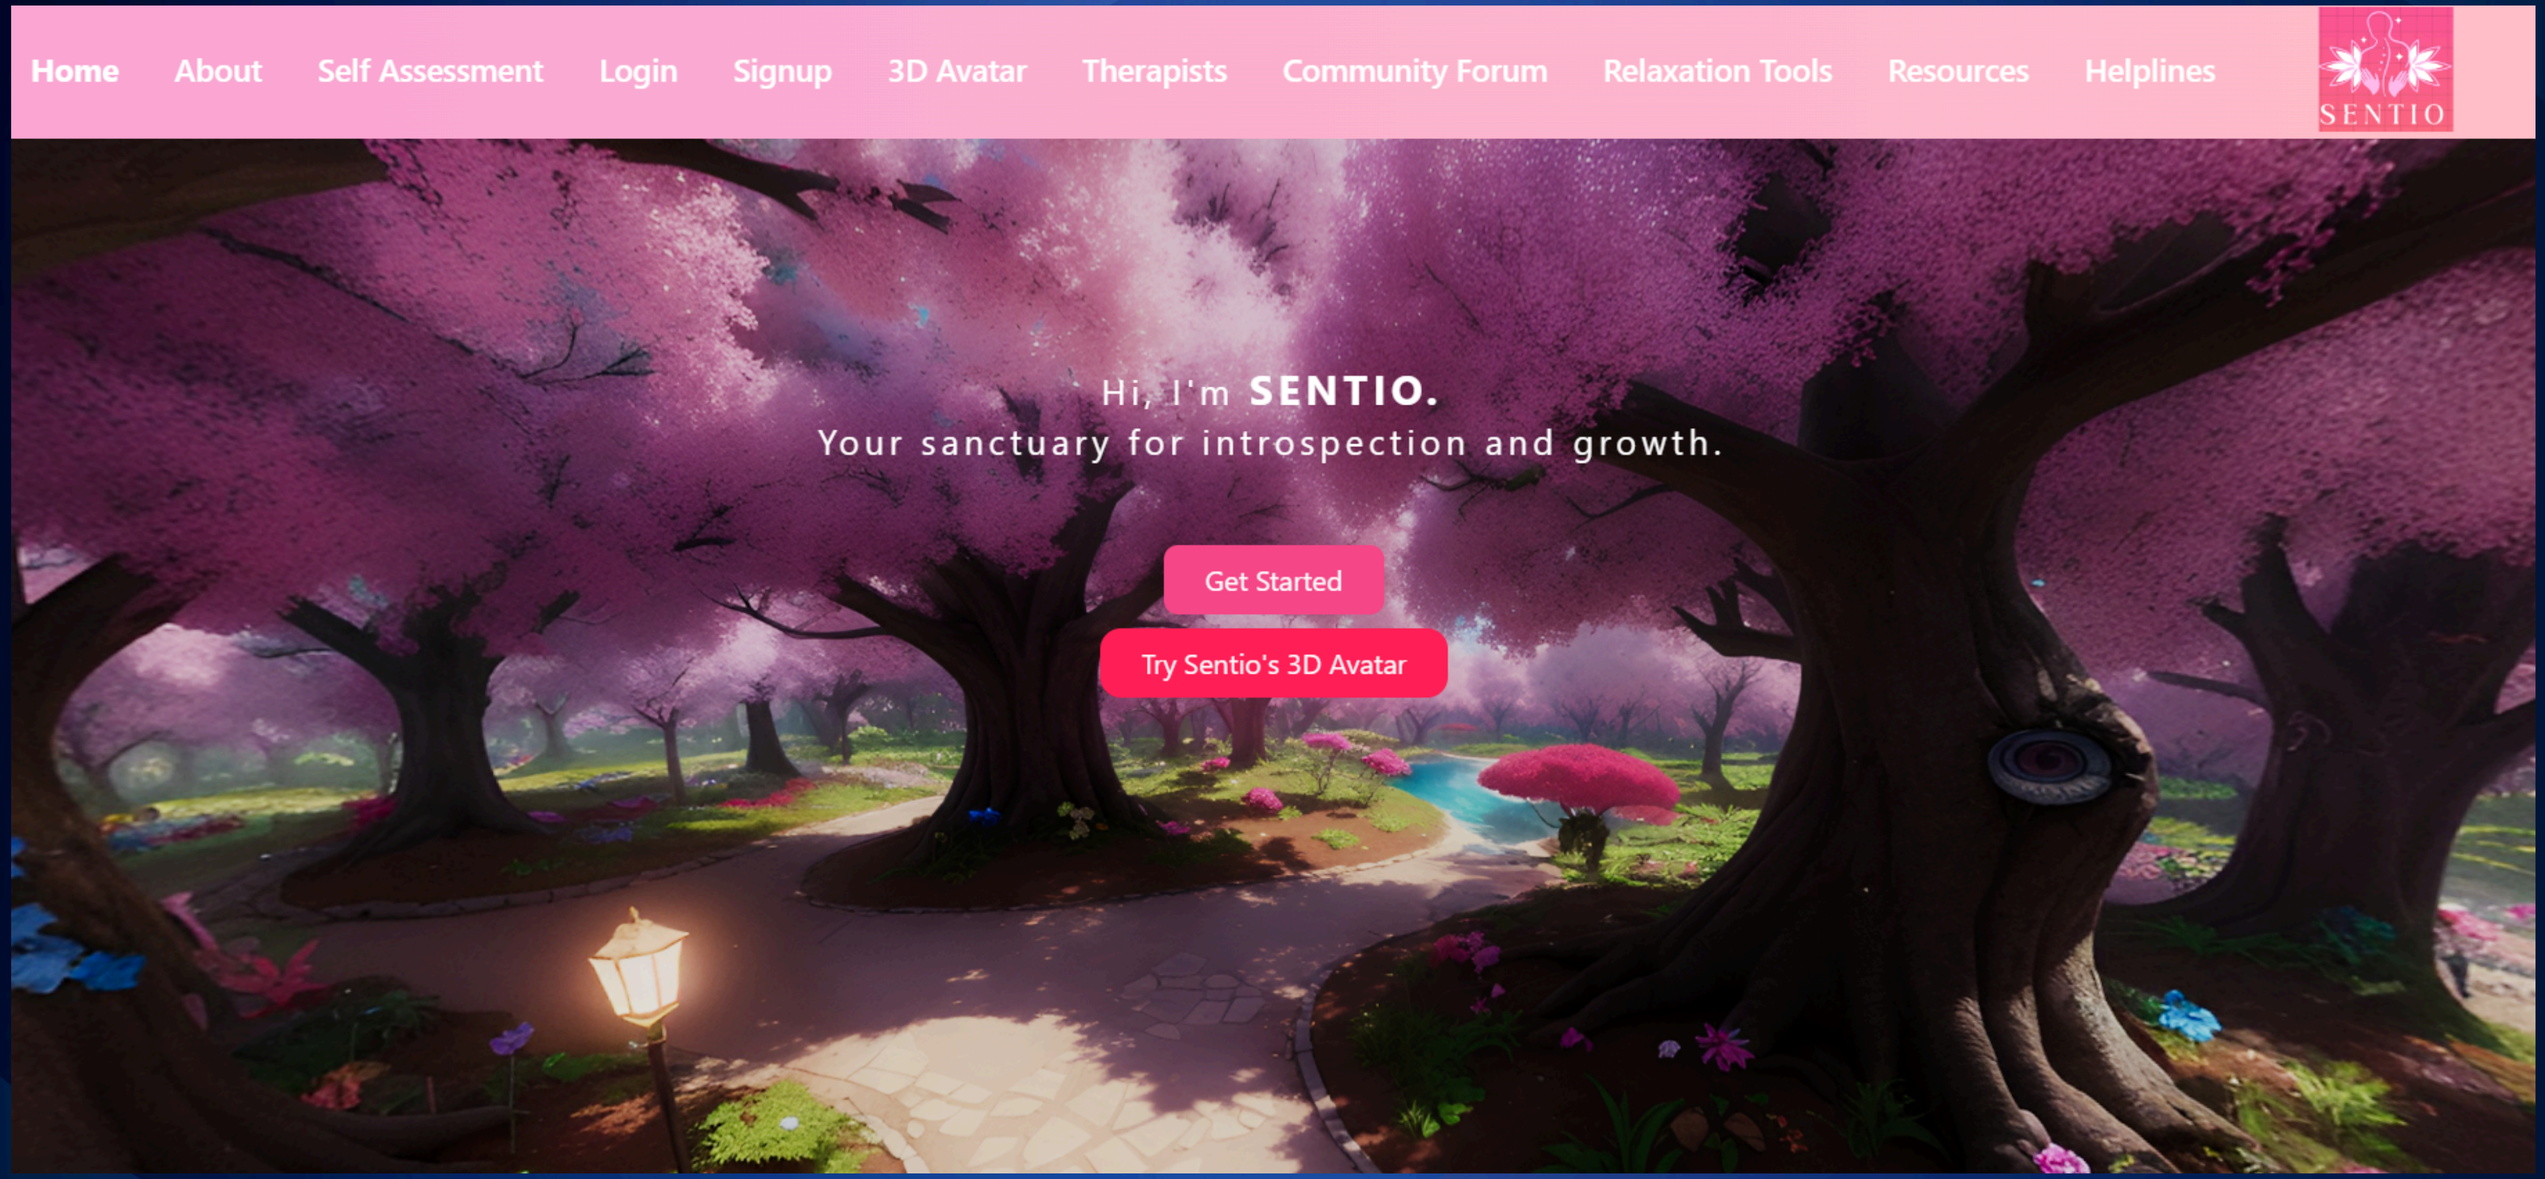

USES

- First Impression: Acts as the face of the platform, attracting and engaging new users.
- Clear Navigation: Guides users to key sections like login, features, and assessments effortlessly.
- Builds Trust: Testimonials and FAQs create a sense of community and reliability.
- Highlights Value: Pricing and features sections help users understand the benefits.

FEATURES

- Key Features Section: Showcases core functionalities like the AI chatbot, self-assessments, community forum, etc.
- FAQs: Provides quick answers to common user queries for easy onboarding.
- Testimonials: Displays user feedback to build credibility and trust.
- Pricing Plans: If applicable, outlines subscription options with benefits for each tier.
- 3D Background: An interactive, visually engaging 3D design to enhance user experience.

ABOUT PAGE

Introduction to the Platform: A dedicated page that outlines the mission, vision, and purpose behind the emotional support AI chatbot.

USES

- Builds Trust: Helps users understand the platform’s purpose and credibility.
- Humanizes the Project: Personalizes the experience by introducing the people behind the initiative.
- Clarifies Objectives: Clearly communicates how the platform aims to support mental well-being.
- Encourages Engagement: Motivates users to explore more features with confidence.

FEATURES

- Mission & Vision Statement: Highlights the core goals and values driving the platform.
- Team Introduction: Showcases the team behind the project with brief bios.
- Platform Overview: Explains key features and how the chatbot supports mental health.

ABOUT PAGE

WELCOME TO SENTIO

SENTIO is an advanced AI-powered emotional support chatbot designed to help individuals navigate through emotional challenges. Our goal is to provide empathetic and personalized assistance, offering a safe space for users to express their feelings. Through dynamic conversations and emotion recognition, SENTIO tailors its responses to meet each individual's emotional needs. Whether you're facing stress, anxiety, or simply need someone to talk to, SENTIO is here to listen and support you every step of the way.

LOGIN/ SIGNUP PAGES

User Authentication System: Secure pages that allow users to create accounts and log in to access personalized features.

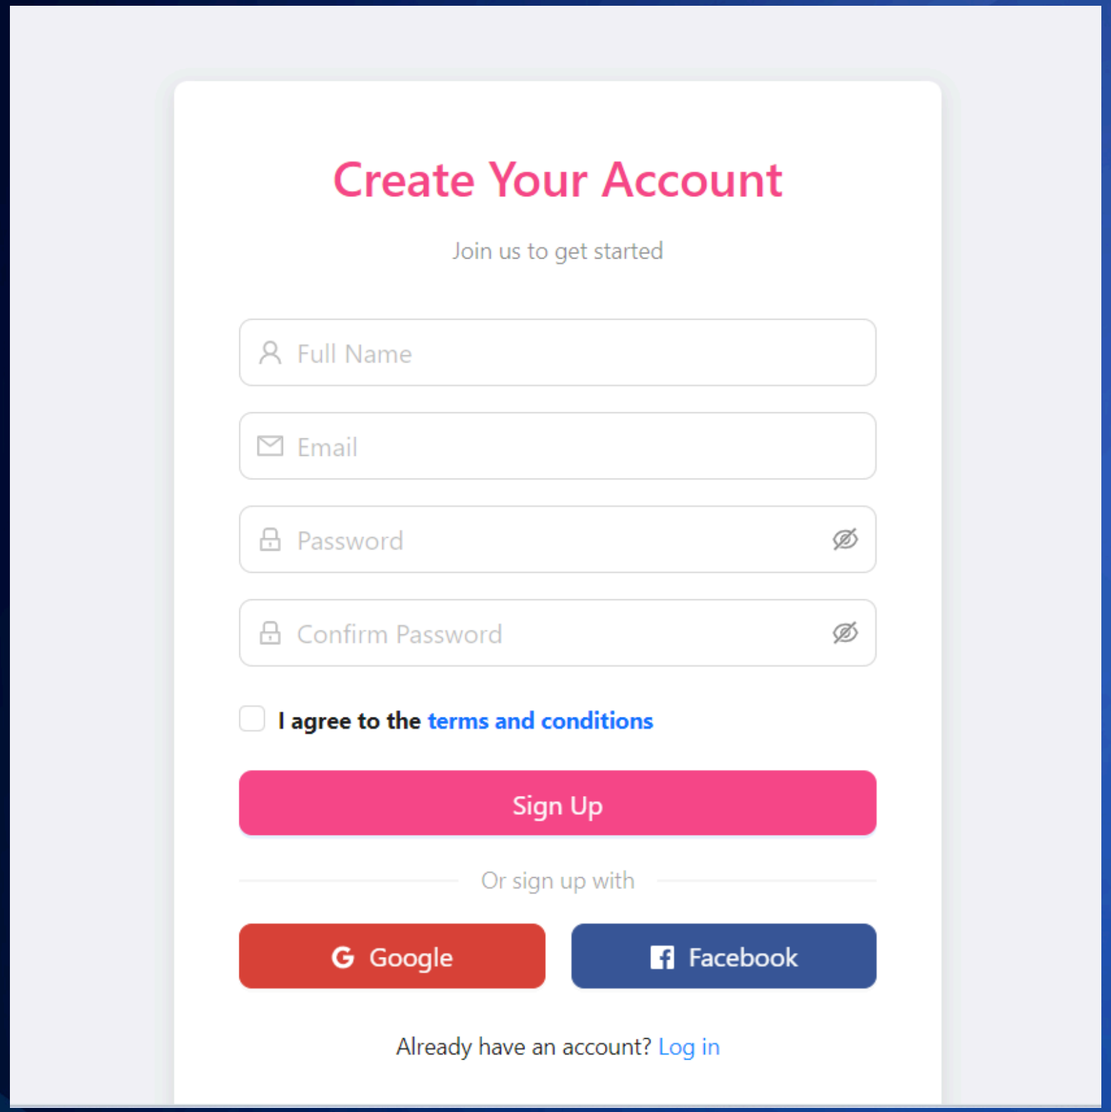

USES

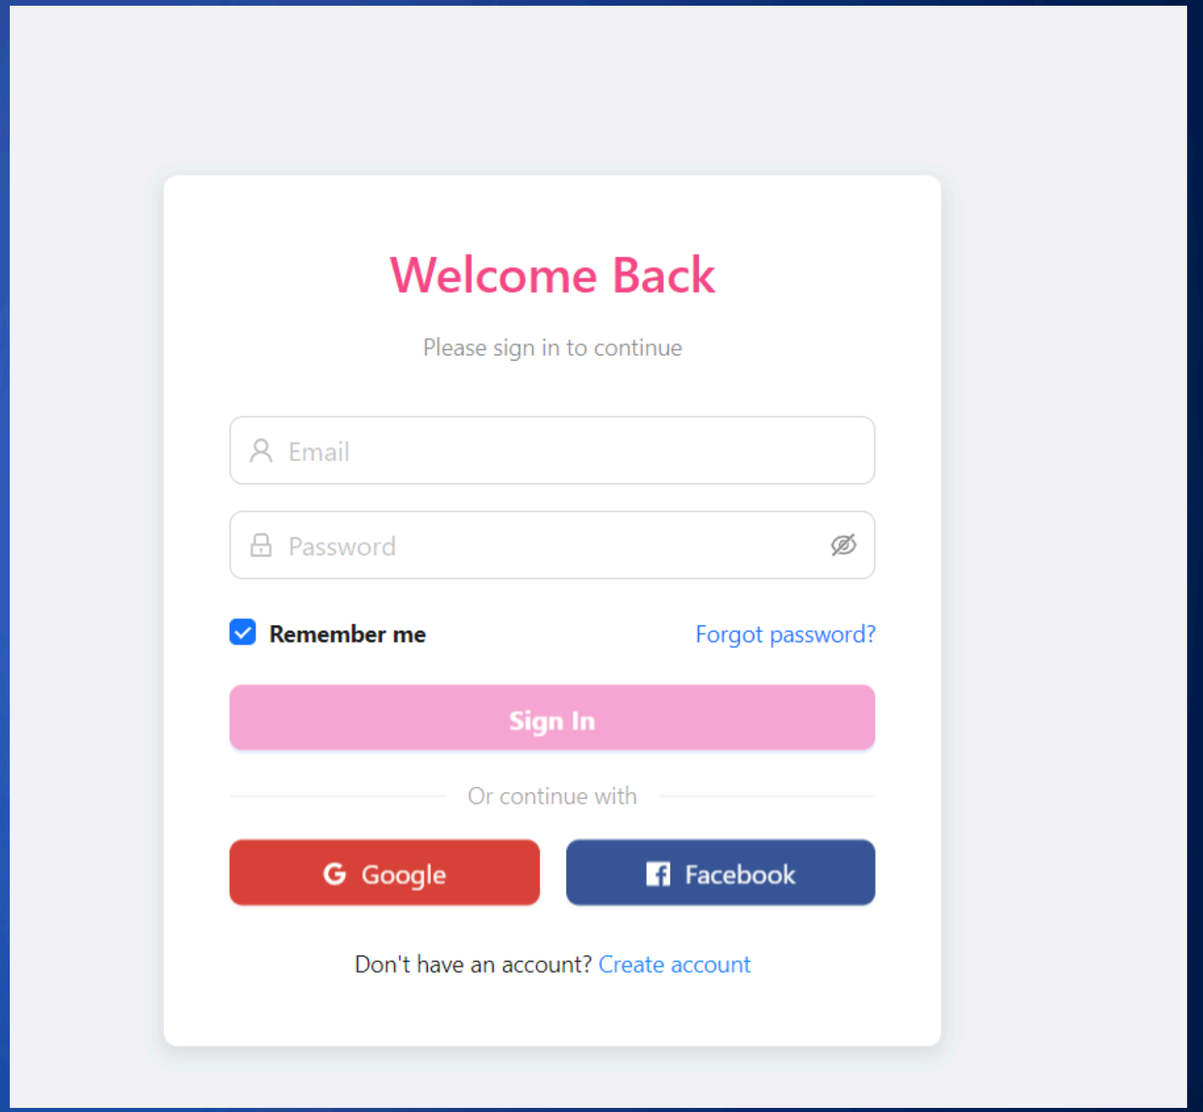

- Personalized Experience: Enables users to save progress, chat history, and assessment data.
- Data Security: Ensures sensitive information is protected through secure authentication protocols.
- Access Control: Restricts certain features to registered users, enhancing privacy and security.
- User Engagement: Encourages long-term use by creating personal accounts.

FEATURES

- Signup Page: Collects user details (name, email, password) to create an account.
- Login Page: Authenticates existing users with email and password.
- Password Management: Forgot password and reset functionality for account recovery.
- Secure Authentication: Implemented using Node.js and Express.js with secure hashing for passwords.

LOGIN/ SIGNUP PAGES

TECH STACK

Frontend

- React.js: For building dynamic, responsive user interfaces.
- Ant Design (AntD): UI library for clean, professional components.
- Framer Motion: Smooth animations and transitions for an engaging UX.
- Lottie: For incorporating lightweight, interactive animations.
- Three.js: 3D graphics rendering (used for the 3D avatar & background).
- React Speech Recognition: Enables voice input for the chat page.

Backend

- Node.js & Express.js: RESTful API development and user authentication (login/signup).
- Flask: Model integration and handling AI responses.
- RAG (Retrieval-Augmented Generation): Enhances chatbot responses with contextual data.

Database

- MongoDB: NoSQL database for storing user data, chat history, posts, assessments, etc.
- Mongoose: ODM (Object Data Modeling) library for MongoDB interaction.

AI/ML Models

- Gemini-1.5-Flash: For real-time conversational AI responses.
- Mistral-7B-Instruct: Powers multilingual 3D avatar responses.
- Google Generative AI: Augments chatbot intelligence for diverse queries.

TECH STACK

Communication

- Twilio API: Implements the calling feature for immediate emotional support.
- ResponsiveVoice API: Provides multilingual voice output for voice assistance.

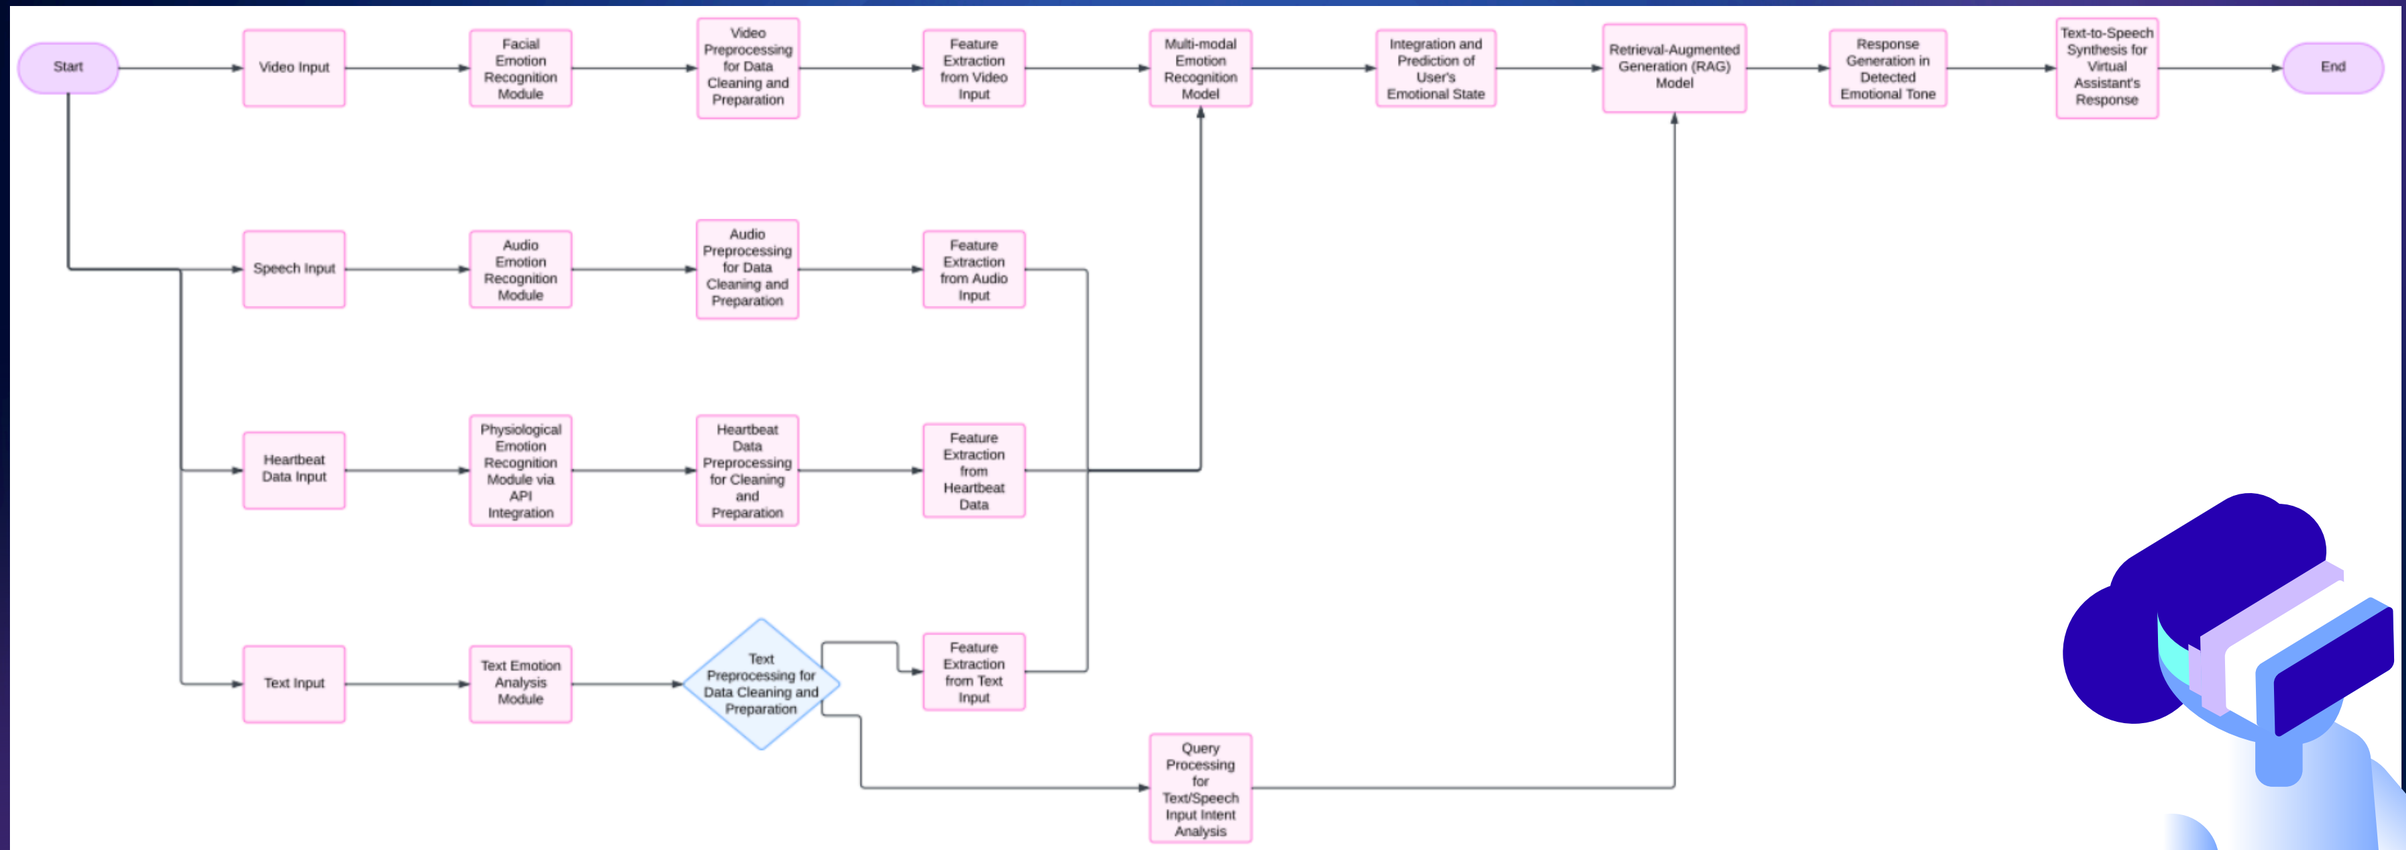

3D Avatar

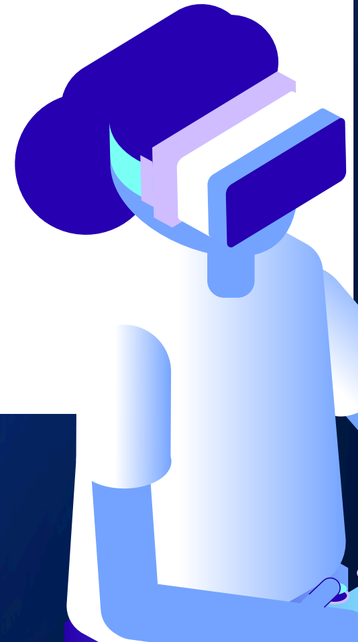

- Ready Player Me: For creating customizable 3D avatars.
- Mixamo: Animates avatars with realistic movements.
- VEBA: Adds facial expressions to avatars.
- FFmpeg + Phonemize: For lip-syncing avatars with spoken content.

Deployment

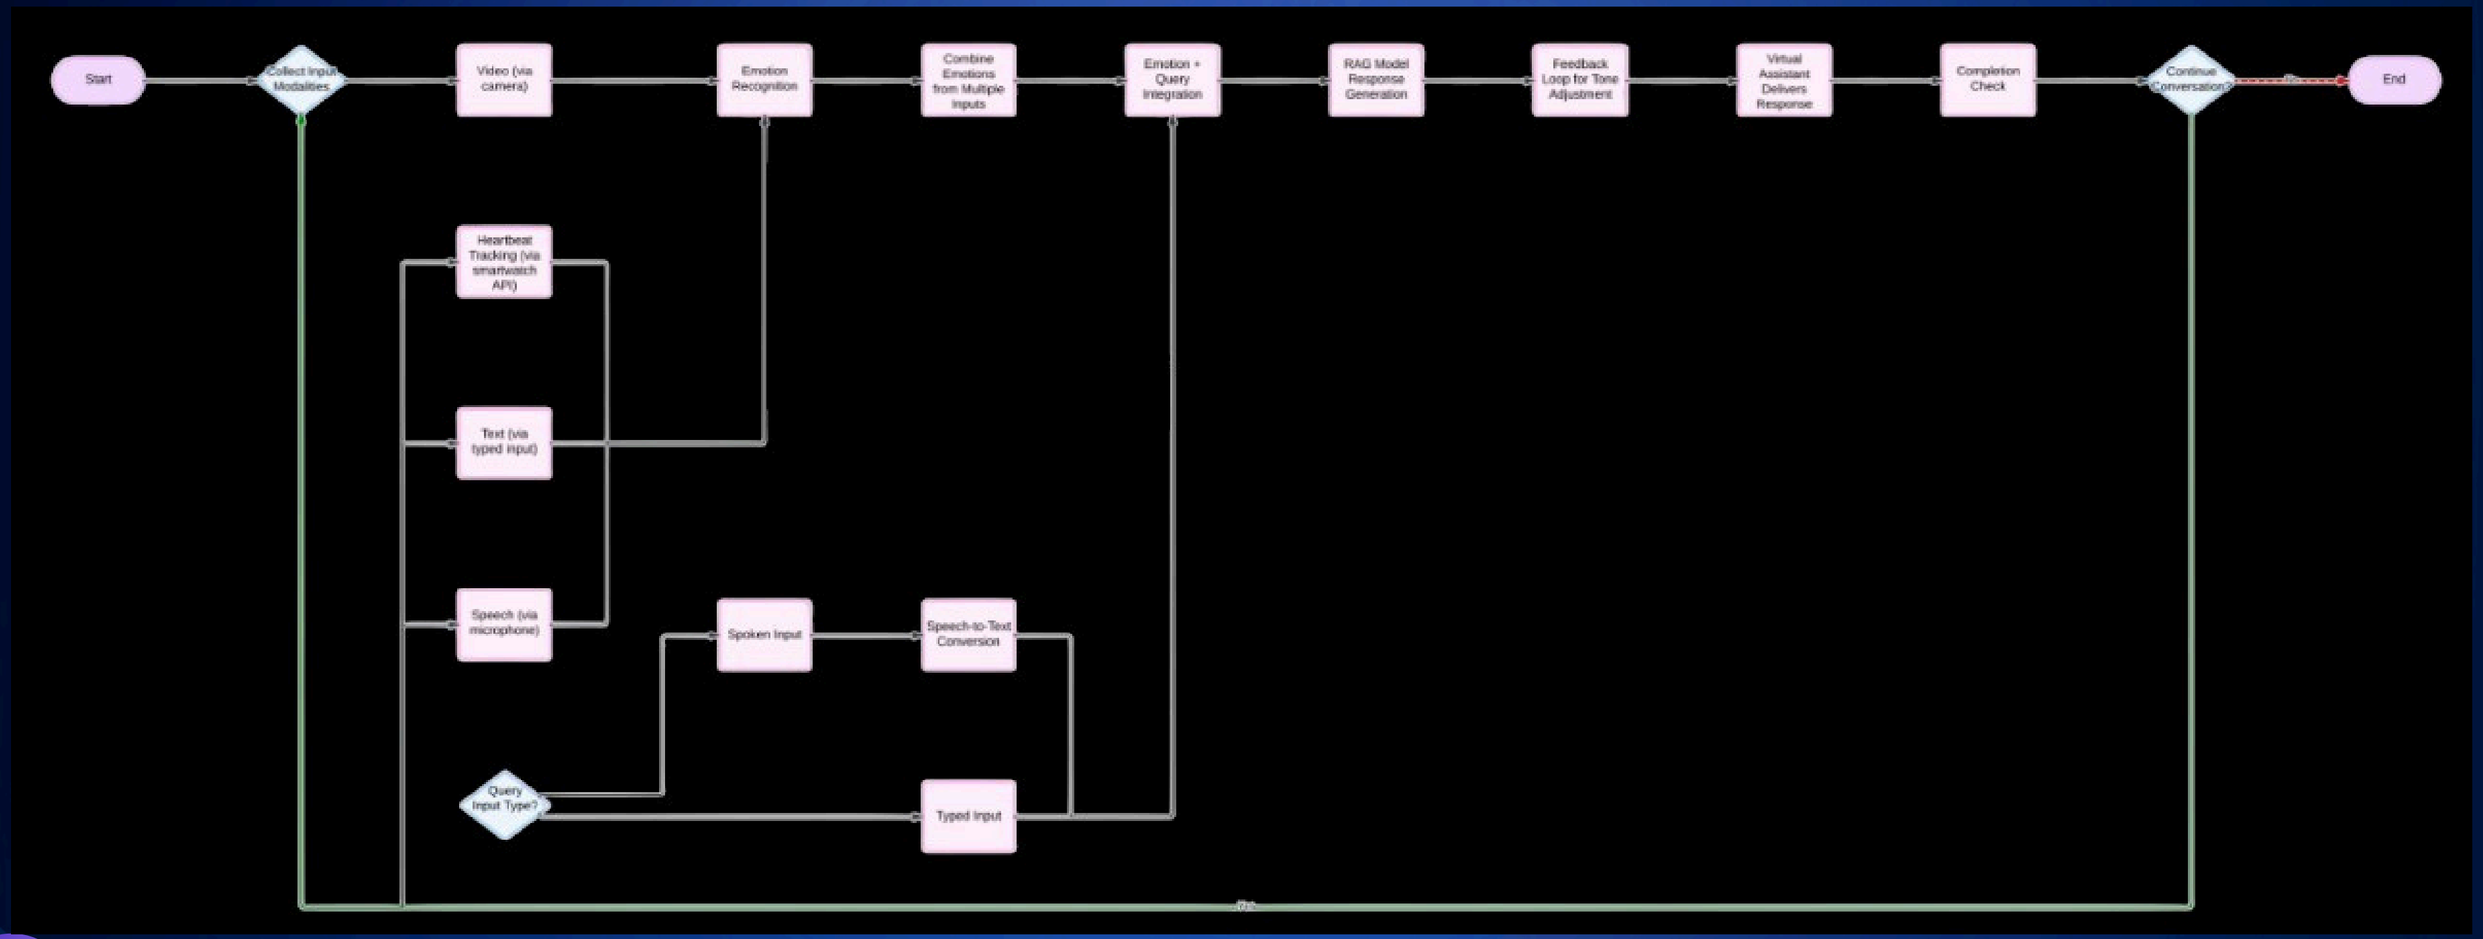

- Frontend: Vercel (optimized for React apps, fast global CDN)
- Backend: Render (suitable for Node.js & Flask APIs, auto-deploy from GitHub)
